## POSTDOC- University of Maryland

The University of Maryland High Energy Physics group (Professors Baden, Belloni, Eno, Hadley, and Skuja) is searching for a Postdoctoral Research Associate to work on the CMS experiment. The successful candidate would be stationed at CERN and be expected to contribute to work on HCAL operations and installation of the Phase-1 upgrade. The Maryland group has a wide range of physics interests, including searches for new particles and precision tests of the standard model, and is also involved with the Phase-2 upgrades, including those of the HB and HGCAL. Our postdocs have opportunities to collaborate with UMD students, postdocs, and faculty, and can also develop their own interests and projects.

Interested candidates should send a resume and arrange for three letters of recommendation to be sent to <a href="mailto:cms-md@physics.umd.edu">cms-md@physics.umd.edu</a>. Applications will be accepted until the position is filled.

The University of Maryland, College Park, an equal opportunity/affirmative action employer, complies with all applicable federal and state laws and regulations regarding nondiscrimination and affirmative action; all qualified applicants will receive consideration for employment. UMD is committed to a policy of equal opportunity for all persons and does not discriminate on the basis of race, color, sex, pregnancy, gender identity or expression, sexual orientation, marital status, age, national origin, political affiliation, physical or mental disability, religion, protected veteran status, genetic information, personal appearance, or any other legally protected status in all aspects of employment. UMD is actively engaged in recruiting, hiring, and promoting underrepresented communities; minorities, women, individuals with disabilities, and veterans are encouraged to apply.
